DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

1. **In the Specification:**

i. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper."

Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

There is no copy for the Japanese Unexamined Patent Publication No. H06-176592 cited in the specification.

ii. The title of the invention is not descriptive. **A new title is required that is clearly indicative of the invention to which the claims are directed.**

2. **In the drawings:**

Figures 7 and 8 should be labeled as "PRIOR ART". A new corrected of Drawings is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 1-5 would be allowed over Prior Art.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for allowance is the inclusion of using both high and low potential source lines to connect the source of memory cells of adjacent bit line in mask programming not found in the art of references.
